

MOHAMED HANEEN

Job Title: ERP Specialist / Python Developer / Software Developer

Phone: +91 7034436936 | Email: mohdhaneen228@gmail.com | [LinkedIn](#) | Location: Kerala, India

PROFESSIONAL SUMMARY

ERP and Technology Professional with 1+ year of experience in **Odoo and Zoho ERP** implementation, product development, and business process optimization. Bridges business requirements and technical solutions effectively, with additional expertise in **Python development** and **cybersecurity**. Holds an MCA degree with a track record in workflow automation, functional testing, data management, and user support.

SKILLS

- **ERP & Business Applications:** Odoo ERP | Zoho ERP | ERP Implementation | ERP Configuration | Business Process Optimization | Workflow Automation | Data Migration | User Training & Support
- **Product & Business Analysis:** Product Development | Product Planning | Feature Analysis | Requirements Gathering | Business Analysis | Market Research | Competitor Analysis | Stakeholder Management
- **Software Development & Testing:** Python | JavaScript | MySQL | Software Development | Software Testing | User Acceptance Testing | Quality Assurance
- **Data Management & Reporting:** Data Management | Data Validation | Report Generation | Dashboard Analysis | Documentation | Process Documentation | Performance Monitoring
- **Technical Support & Operations:** Application Support | Troubleshooting | System Configuration | Issue Resolution | User Support | Process Improvement | Cross-Functional Collaboration
- **Professional Strengths:** Analytical Problem Solving | Communication Skills | Team Collaboration | Time Management | Adaptability | Attention to Detail | Client Coordination.

WORK HISTORY

	Location Year
ERP Specialist Optifi Technologies <i>DUTIES & RESPONSIBILITIES</i> • Supported implementation, customization, and optimization of Odoo and Zoho ERP solutions aligned with client business requirements. • Collaborated with stakeholders to analyze business workflows, identify gaps, and recommend automation opportunities to improve operational efficiency. • Conducted product research, competitor analysis, and market studies to support product strategy, feature prioritization, and business decision-making. • Contributed to product planning, requirements gathering, feature analysis, and documentation for ERP and SaaS-based applications. • Participated in functional testing, user acceptance testing, bug validation, and quality assurance activities to ensure product reliability and usability. • Managed data validation, reporting, and module-level data management to maintain system accuracy and data integrity. • Provided functional and technical support, troubleshooting issues and ensuring successful user adoption. • Worked closely with development, design, and business teams to improve product usability, customer experience, and overall system performance.	Kannur, Kerala, India 02/2026 – 06/2026
Software Developer Alrais Labs <i>DUTIES & RESPONSIBILITIES</i> • Designed, developed, and deployed customized Odoo ERP solutions based on client-specific business requirements. • Built and maintained custom backend modules, implementing ORM logic, business workflows, and REST API integrations. • Integrated third-party applications and external services to extend ERP functionality and improve operational efficiency. • Collaborated with cross-functional teams to gather requirements, optimize system architecture, and resolve technical challenges. • Provided post-deployment support, performance optimization, debugging, and bug fixes for production environments. • Documented technical implementations, module workflows, and deployment procedures to ensure maintainability. • Successfully participated in Odoo version migration activities from Odoo 18 to Odoo 19, ensuring compatibility and system stability.	Vadakara, Kerala, India 05/2025 – 02/2026
Cyber Security Intern Intellisurge Technologies <i>Pursued this internship concurrently with the Software Developer role to deepen expertise in cybersecurity.</i> • Developed role-based authentication and authorization mechanisms using JWT to strengthen application security. • Optimized SQL queries and backend session handling to improve application performance and reduce security risks. • Conducted phishing simulation campaigns using MailHog to assess organizational email security awareness. • Prototyped secure email analysis workflows using Outlook API for phishing detection and response research. • Applied secure coding practices, vulnerability assessment techniques, and security testing methodologies throughout development activities.	Hyderabad, India 06/2025 – 07/2025

EDUCATION

Course Completed Certified Authority	Location Year
Master’s Degree in Computer Science Pondicherry University	Pondicherry, India 2025
Bsc in Computer Science Pondicherry University.	Pondicherry, India 2023

PROJECTS DONE

- Log Anomaly Detection System using Deep Learning and One-Class SVM —**
- Tech Stack: Python, Dash, ML, NLP, TensorFlow, One-Class SVM, Scikit-learn, Pandas, NumPy, HDFS Logs, Matplotlib.
- Built a deep learning–based pipeline to detect anomalies in HDFS and BGL structured logs, achieving strong precision and recall during testing.
 - Implemented a BiLSTM model to learn sequential patterns and integrated One-Class SVM to reduce false positives compared to baseline ML models.

- Designed an interactive Dash web app for real-time log uploads, anomaly visualization, and event sequence analysis, reducing debugging time during simulations.
- Automated data preprocessing and retraining, ensuring adaptability to evolving log formats without manual intervention.

Hybrid AES, 3DES and RSA Encryption System —

Tech Stack: Python,Cryptography Tkinter, AES, 3DES, RSA, SHA-256, PyCryptodome, Cryptography Library.

- Engineered a multi-layer encryption framework combining AES, 3DES, and RSA, increasing resistance to brute-force attacks compared to single-algorithm encryption.
- Secured key exchange and authentication with RSA digital signatures, SHA-256 hashing, and PSS padding, eliminating replay and forgery attempts in controlled testing.
- Built a desktop GUI in Tkinter for seamless encryption, decryption, and verification, reducing handling errors compared to manual CLI-based methods.
- Simulated secure messaging and file transfer workflows, demonstrating practical deployment of hybrid cryptography in real- world use cases.

PERSONAL INFORMATION

- Nationality: Indian
- Languages Known: **English, Hindi, Arabic, Tamil & Malayalam.**
